

**ICANN PROGRAM AT JAIPA,
Kobe, Wednesday March 13**

Location: Fish in the Forest Tooth Tooth / Sora Botanical Garden
2-8 Hatobacho, Chuo-ku, Kobe 650-0042, Hyogo

16:00 Welcome Message

- Wolf-Ulrich Knoben, ICANN ISPCP
- Yoshihiro Aita, JAIPA

16:10 Panel Discussion: Ensuring A Trusted Internet with Universal Acceptance and IDNs

Are your routing systems, web software and email systems ready? Capturing the market opportunity while mitigating abuse with domain names in multiple alphabets (known as Internationalized Domain Names or IDNs).

- Ajay Data, Datainfosys
- Maarten Botterman, ICANN Board
- Akinori Maemura, ICANN Board

16:50 Opening Remarks: The Internet of Things and Network Operations

The role - and evolution - of domain names in the era of 5G networks.

- Philippe Fouquart, Orange

17:10 Panel Discussion: Website / DNS Blocking and Filtering

The rising risk and technical effects of DNS and domain name blocking as a consequence of legislative or regulatory developments, especially relative to content or copyright control. What are the latest developments?

- Narelle Clark, Pavonis Consulting
- Toshiaki Tateishi, JAIPA
- John Crain, ICANN Office of CTO

17:50 Business Depends on Security, Stability and Resiliency – A Shared Responsibility

- Claudia Selli, ICANN Business Constituency
- Scott McCormick, HackerOne
- Mark Svancarek, Microsoft

18:30 Drinks Reception – Closing Remarks by Chris Mondini, ICANN and Toshiaki Tateishi, JAIPA

20:00 Conclusion
